

# ACTIVITY BOOK FOR KIDS

## FROM YOUR FRIENDS AT CHROMER SPORT FISHING

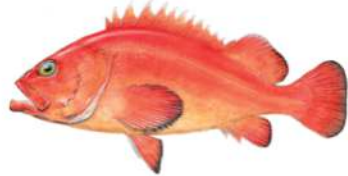

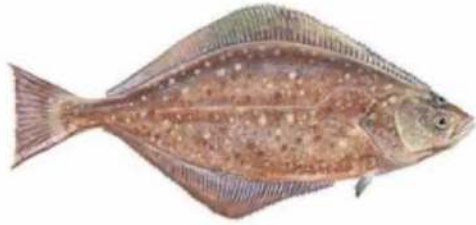

Hi everyone. I put this together for something fun that parents and kids can do together while we're all stuck inside. Older kids can do probably do most of it on their own, little kids will need some help. I have a four year old who I was trying to make this fun for her and hope your family gets some enjoyment (and learn something) from it as well.

On the last page there is a contest for kids with some prizes!

Chromer Sport Fishing is a sport fishing guide service in British Columbia, Canada.

## TRUE OR FALSE #1?

1. Orcas are the biggest dolphin in the world?

True False

2. Halibut like to eat donuts?

True False

3. Salmon can migrate up to 3000 kilometres?

True False

4. Sunfish can grow to over 2000 pounds?

True False

5. Jellyfish are made up of 95% water.

True False

6. There is only 2 types of Sea Stars in the world?

True False

7. Kelp is a very slow growing type of sea plant?

True False

8. Sea otters are part of the weasel family?

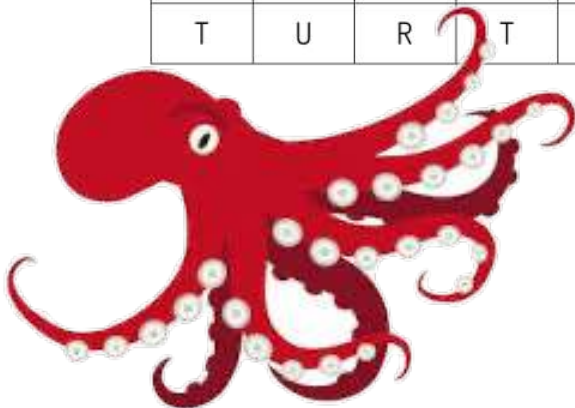

True False

## True & False Answers

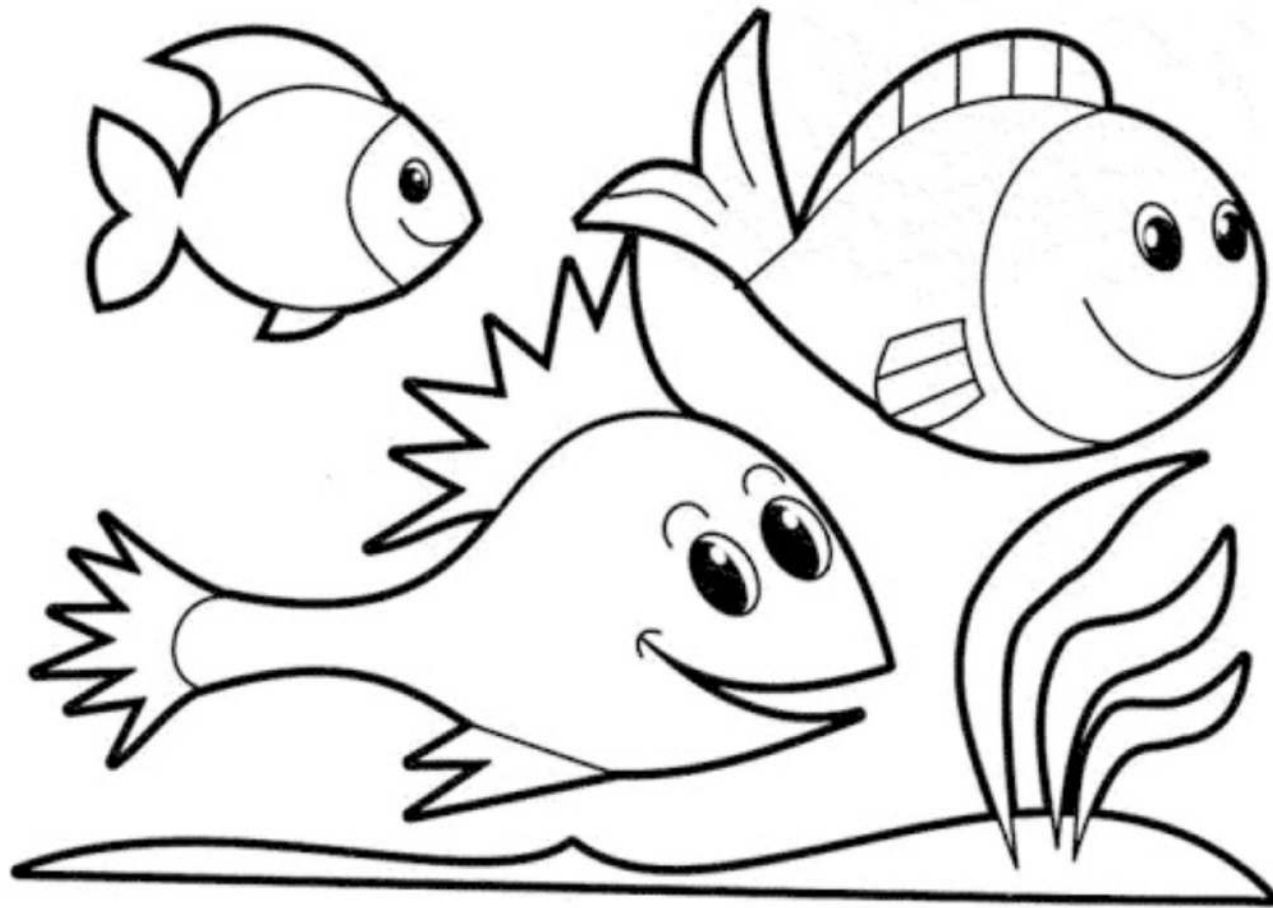

1. True. Orcas, or killer whales, are the largest of the dolphins and one of the world's most powerful predators.
2. Maybe, but we'll go with false. Being strong swimmers, halibut are able to eat a large variety of fishes, including cod, turbot, and pollock, and some invertebrates, such as octopus, crab and shrimp.
3. True. Salmon can migrate more than 3,000 kilometres upstream through freshwater to spawn (Yukon River). That is like driving halfway across Canada.
4. True. The ocean sunfish Mola mola and southern sunfish, Mola alexandrini, both recorded at up to 4.6 m (15 ft) in length<sup>[2]</sup> and 2,300 kg (5,100 lb) in weight.
5. True. About 5% percent of jellyfish bodies are made of structural proteins, muscles, and nerve cells, while the remaining 95% is water.
6. False. There are over 1500 different species of sea star in world's oceans.
7. False. They can grow at a rate of 60 cm (2 ft) a day to reach over 45 m (150 ft) long in one growing season.
8. True. Adult sea otters typically weigh between 14 and 45 kg, making them the heaviest members of the weasel family, but among the smallest marine mammals.

## TRUE OR FALSE #2?

1. An octopus is poisonous?

True False

2. Tuna can swim to speeds of up to 200 miles an hour.

True False

3. There are over 30,000 different kinds of fish in the world.

True False

4. Sealions can grow to over 2000 pounds.

True False

5. This biggest salmon ever was caught in Texas?.

True False

6. There is an actual animal called a Sea Cucumber?

True False

7. British Columbia is on the Pacific Ocean?

True False

8. Humpback whales are tiny and you can keep them in your bathtub.

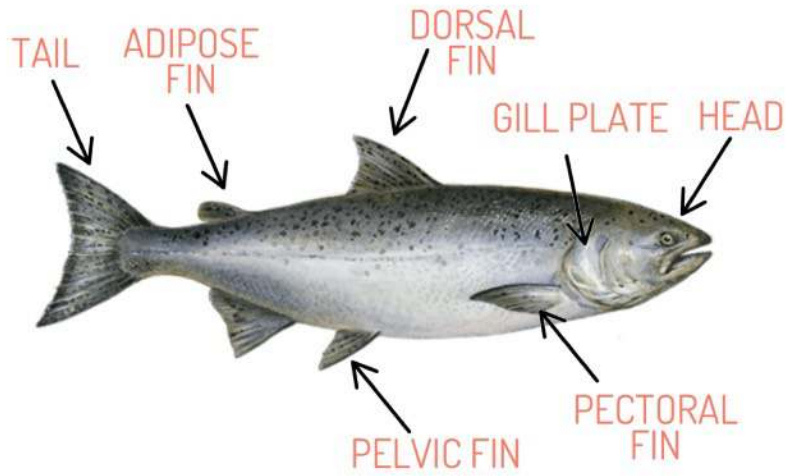

True False

## True & False Answers

1. True. All octopuses are thought to have some venom that comes from bacteria living inside the animals. Most don't have enough poison to harm people. But a bite from a small blue-ringed octopus can paralyze a human adult in minutes.
2. False. Tuna can swim at speeds of up to 70 kph (43 mph)
3. True. There are over 30,000 species of fish in the world and there are more to be discovered.
4. True. The largest sea lion is Steller's sea lion, which can weigh 1,000 kg (2,200 lb) and grow to a length of ten feet.
5. False. It was caught in Alaska, not Texas. On May 17, 1985, Les Anderson of Soldotna, AK landed the all-tackle world record chinook salmon, a 97-pound, 4-ounce beast from the Kenai River. The mammoth Chinook was nearly 5 feet long and had an amazing 37.5-inch girth!
6. True. Sea Cucumbers are a real thing! They are marine animals with a leathery skin and an elongated body containing a single, branched gonad. Sea cucumbers are found on the sea floor worldwide.
7. True. British Columbia is on the Pacific Ocean and the total length of the British Columbia Coast is over 25,725 kilometres (15,985 mi), making up about 10% of the Canadian coastline!
8. False! You can't have a humpback whale in your bathtub you silly! Humpback whales are enormous creatures — about the size of a school bus.

🌿🌿 CAN YOU LEAD THIS ANGLER TO CATCH A BIG STURGEON? 🌿🌿

## STURGEON FACTS

Sturgeon live in large, freshwater lakes and rivers but some species also travel to the ocean and return to rivers and lakes to breed.

Their average lifespan is 50 to 60 years, and their first spawn does not occur until they are around 15 to 20 years old.

Sturgeon can be found in British Columbia's Fraser River.

All sturgeon in British Columbia have to be released when caught. Don't take them out of the water and make sure they are handled with care. Even though they are big you have to be extra gentle with them.

# COLOURING CONTEST

DRAW YOU AND YOUR FAMILY OUT FISHING AND DON'T FORGET THE FISH! GET YOUR MOM AND DAD SO SEND A PICTURE OF YOUR DRAWING TO [CHROMERSPORTFISHING@GMAIL.COM](mailto:CHROMERSPORTFISHING@GMAIL.COM). THERE ARE SOME COOL PRIZES FOR KIDS!
